The Rhode Island Office of the State Architect (RIO SA) has announced the release of the Rhode Island School Facilities Assessment Commission (RIASCC) report. The report, titled "Rhode Island School Facilities Assessment: A Comprehensive Systemic Assessment," is the result of a yearlong, independent analysis of all public school buildings in the state. The report is intended to provide a comprehensive assessment of the condition of public school facilities and to identify areas where improvements are needed.

The report is available for download on the RIO SA website at https://www.riotri.com/. The report includes a detailed analysis of each school building in the state, as well as recommendations for repair, renovation, and replacement. The report also provides a prioritization of school buildings based on the severity of their condition.

In addition to the report, RIO SA is hosting a series of briefing sessions throughout the state to discuss the findings of the report and to provide opportunities for stakeholders to ask questions and offer input. The briefing sessions will be held at various locations around the state on different dates.

RIO SA is also working with local school districts to implement the recommendations of the report. The agency is providing technical assistance and funding to support the implementation of the recommendations.

For more information about the report and briefing sessions, please visit the RIO SA website at https://www.riotri.com/ or contact the agency at info@riotri.com.
